

# *Notes for ECE 30100 - Signals and Systems*

*Zeke Ulrich*

*January 12, 2025*

## *Contents*

*Course Description*      1

*Introduction*      2

## *Course Description*

Classification, analysis and design of systems in both the time- and frequency-domains. Continuous-time linear systems: Fourier Series, Fourier Transform, bilateral Laplace Transform. Discrete-time linear systems: difference equations, Discrete-Time Fourier Transform, bilateral z-Transform. Sampling, quantization, and discrete-time processing of continuous-time signals. Discrete-time nonlinear systems: median-type filters, threshold decomposition. System design examples such as the compact disc player and AM radio.

## *Introduction*
